

**WE ARE LOOKING FOR A**  
**Software Developer C# (m/w/d)**  
**Leipzig**

### **We develop insights- for the health and life of people**

We are a leading, future-oriented young company for biosensors and digital diagnostic platforms. We build the core competencies of our company on the qualifications of our employees and their many years of practical experience. At our location in Berlin-Adlershof with about 30 employees we develop and produce a novel digital diagnostic platform for rapid antibody diagnostics and soon also revolutionary DNA rapid diagnostics.

We address industrial companies, laboratories, physicians, clinics and pharmaceutical companies that require timely results and reliable statements in the field of immune and targeted DNA diagnostics.

The company is constantly growing and we are expanding our sales department. Immediately we are looking for a

### **Software Developer C# (m/w/d)**

#### **Your tasks**

- Development of software to control our smart devices (sensors, pumps, fluidics) in close coordination with hardware development
- Integration of the software into existing hardware and software environments
